Allowable Charge: Reimbursement for covered services is based upon allowable charge as determined by Anthem Blue Cross and Blue Shield. Allowable charge means the contracted amount for participating providers or the maximum benefit allowance for non-participating providers. Anthem's determination of allowable charge is the maximum amount approved for any particular service. Deductible, coinsurance, or other cost sharing amounts are based on this allowance and are the amounts the member pays the provider.

This disclosure statement provides only a brief description of some important features and limitations of your policy. The certificate itself sets forth in the detail the rights and obligations of both you and the insurance company. It is important that you review the certificate once you are enrolled.

Coverage for treatment as part of a clinical trial:

Includes coverage for medical treatment provided in a Phase I, Phase II, Phase III or Phase IV clinical trial for the treatment of cancer or in a Phase II, Phase III, or Phase IV study or clinical trial for the treatment of chronic fatigue syndrome conducted in the state of Nevada.

Coverage for medical treatment is limited to:

- Any drug or device approved for sale by the Food and Drug Administration.
- The cost of any reasonably necessary health care services required from the medical treatment or complications thereof arising out of the medical treatment provided in the clinical trial.
- The initial consultation to determine whether the person is eligible to participate in a clinical trial.
- Health care services required for the clinically appropriate monitoring of the person during the clinical trial.

Coverage for the management and treatment of diabetes

Includes coverage for medication, equipment, supplies, and appliances that are medically necessary for the treatment of diabetes type I, type II, and gestational diabetes.

Coverage for self-management of diabetes, including:

- The training and education provided to a person covered under the contract after initial diagnosis of diabetes which is medically necessary for the care and management of diabetes, including, without limitation, counseling in nutrition and the proper use of equipment and supplies for the treatment of diabetes.
- Training and education which is medically necessary as a result of a subsequent diagnosis that indicates a significant change in the symptoms or condition of the program of self-management of diabetes.
- Training and education which is medically necessary because of the development of new techniques and treatment for diabetes.

Medically Necessary

An intervention that is or will be provided for the diagnosis, evaluation and treatment of a condition, illness, disease or injury and that Anthem, subject to a member's right to appeal, solely determines to be:

- Medically appropriate for and consistent with the symptoms and proper diagnosis or treatment of the condition, illness, disease or injury.
- Obtained from a physician and/or licensed, certified or registered provider.
- Provided in accordance with applicable medical and/or professional standards.
- Known to be effective, as proven by scientific evidence, in materially improving health outcomes.
- The most appropriate supply, setting or level of service that can safely be provided to the member and which cannot be omitted consistent with recognized professional standards of care (which, in the case of hospitalization, also means that safe and adequate care could not be obtained as an outpatient).
- Cost-effective compared to alternative interventions, including no intervention ("cost effective" does not mean lowest cost).
- Not experimental/investigational.
- Not primarily for the convenience of the member, the member's family or the provider.
- Not otherwise subject to an exclusion under the Certificate.

The fact that a physician and/or provider may prescribe, order, recommend or approve care, treatment, services or supplies does not, of itself, make such care, treatment, services or supplies medically necessary.

Allowable Charge Reimbursement for benefits paid, except as provided below, is the allowable charge. The allowable charge is the dollar amount determined and approved by Anthem for covered services and procedures. Your applicable cost sharing requirements are based on the allowable charge.

For PPO and participating providers, the allowable charge is the contracted amount. PPO and participating providers have signed agreements to accept the contracted amount as payment in full. The contracts between Anthem and its providers include a “hold harmless” clause that provides that a member cannot be liable to the provider for moneys owed by Anthem for health care services covered under this certificate.

For non-participating providers, the allowable charge is the maximum benefit allowance. The member must pay any difference between Anthem’s maximum benefit allowance and the non-participating provider’s charge, except as provided below.

NOTE: Anthem will reimburse covered services received from a non-participating provider on the basis of billed charges rather than the maximum benefit allowance in the following circumstances:

- Emergency care (when rendered either within or outside the State of Nevada)
- Where inpatient hospital care at a non-participating provider is necessary due to the nature of treatment
- Where inpatient hospital care at a non-participating provider is necessary due to participating provider hospital capacity

In all other situations the maximum benefit allowance does apply.

“Emergency medical condition” means a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) so that a prudent layperson, who possesses an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in one of the following conditions:

1. Placing the health of the individual (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy;
2. Serious impairment to bodily functions; or
3. Serious dysfunction of any bodily organ or part.

“Emergency services” means, with respect to an emergency medical condition:

1. A medical screening examination that is within the capability of the emergency department of a hospital, including ancillary services routinely available to the emergency department to evaluate such emergency medical condition, and
2. Within the capabilities of the staff and facilities available at the hospital, such further medical examination and treatment to stabilize the patient.

The term **“stabilize”** means, with respect to an emergency medical condition:

To provide such medical treatment of the condition as may be necessary to assure, within reasonable medical probability, that no material deterioration of the condition is likely to result from or occur during the transfer of the individual from a facility. With respect to a pregnant woman who is having contractions, the term “stabilize” also means to deliver (including the placenta), if there is inadequate time to effect a safe transfer to another hospital before delivery or transfer may pose a threat to the health or safety of the woman or the unborn child.

Some services or supplies may have an annual maximum benefit. Be sure to review your summary of benefits for further details on what services may have a maximum benefit.
